

COOL Science Experiments HEADQUARTERS

Light Refraction Science Experiment Video

Items Needed

- Piece of Paper
- Marker
- Glass
- Water

Instructions

1. Get a sheet of paper, and draw two arrows on it. One arrow near the top and one arrow near the bottom. Make the arrows point in the same direction.
2. Fill a glass with water.
3. Slowly lower the piece of paper behind the glass of water.
4. Look through the glass of water and watch what happens.
